

Job Title: Microbiology Manager

Working Hours: 37.5 hours per week

Working Days: Monday - Friday

Location: Livingston

Source Bioscience is an international genetic analysis, diagnostics, analytical chemistry and stability storage business serving the global research pharmaceutical and healthcare markets. We pride ourselves on maintaining a friendly working culture within an ambitious and growing organisation. We offer aspiring individuals the ideal environment and opportunity to succeed.

We are seeking applications from highly motivated candidates with a strong background in microbiology. The successful candidate will have over 5 years laboratory experience working in a GMP/GLP manufacturing or laboratory testing industry. Candidates should possess a higher degree in a relevant scientific discipline, ideally holding a PhD, although a high level of relevant laboratory experience will be similarly advantageous.

Knowledge of sterility and endotoxin testing including experience in validation of new methods and techniques is desirable. Experience of management or supervision of a team of scientists will be essential as will a motivational personality and a passion for training.

Please do not apply for this job unless you are able to demonstrate the essential criteria we are seeking within your CV.

If you wish to apply for this post, please forward a copy of your CV, including an email address and contact numbers to: recruitment@sourcebioscience.com

Please be aware that Source BioScience operates a paper-free recruitment process and successful applicants will be contacted via email. If you have not been contacted within 6 weeks of applying for a post, please assume your application has not been successful.
